

CITIES OF THE FUTURE: Promoting Sustainability and Health Together

- New Methodological Approaches

PROGRAM / 09 JUNE 2016

Moderation: Sabine Baumgart / Andrea Ruediger

8:30 am Registration and welcome coffee/ tea

9:00 am Welcome

Marilen Macher (Fritz and Hildegard Berg Foundation) and Sabine Baumgart (TU Dortmund University)

9:15 am „Cities facing global change – perspectives of a major urban transformation“

Uwe Schneidewind • Wuppertal Institute • member of the program board • member of the scientific council of global environmental change

9:45 am The Junior Research Group Salus – Results from a transdisciplinary research process

Heike Koeckler, Maila Hemetek, Raphael Sieber, Steffen Schuele, Rehana Shrestha, Lisa Waegerle

10:25 am The Junior Research Group III *autonomMOBIL* at a glance

10:40 am Coffee break

11:00 am Interdisciplinary and transdisciplinary reflections on health-promoting urban development for all: national and international perspectives

Moderation: Rainer Fehr und Sabine Baumgart

- > How can socio-epidemiological research approaches (multi-level models) contribute to an integrated assessment of multiple burdens?
- > What opportunities of health-promotion can be derived from connecting methodological approaches from spatial planning (place-based) and public health (population-based)?
- > How can socio-technical tools supporting decision making contribute to participation for a health-promoting urban development, particularly with regard to disadvantaged groups?
- > What kind of strategies are required to guarantee meaningful involvement of people with migration background in processes of healthy urban development?

Experts on site:

Gabriele Spies (Ref. Environment and Health Munich): Social inequality, health-related evaluation of multiple-burdens

Dennis Zilske (Planerladen Dortmund e.V.): Consideration of the setting-approach in urban planning

Gudrun Faller (hsg Bochum): Participation in public health and city planning

Martin Knoell (TU Darmstadt University, Department of Design and Urban Development): New methods of the decision making support, among others, with simulation

Aladin El-Mafalaani (University of Applied Science Muenster): Social participation of the migrant community

Experts per video:

Robert Goodspeed (Taubman College, University of Michigan): Planning Support Systems for collaborative planning

Devon C. Payne-Sturgess (University of Maryland, School of Public Health): Environmental justice and citizen based research

Loreto Symmes (University Alberto Hurtado, Santiago de Chile): Participatory planning - experiences of Chile

1:00 pm Lunch break

2:00 pm Workshops, part I

I Potential spaces of participation in planning processes

(Maila Hemetek, Lisa Waegerle, Loreto Symmes, Fabián Alvarado, Beate Blaettner)

II Social-epidemiological methods and data as base for promoting health in space

(Steffen Schüle, Gabriele Bolte)

III Innovative spatial methods and tools for Healthy City Planning

(Rehana Shrestha, Johannes Flacke)

IV Neighbourhood and setting oriented approaches

(Raphael Sieber, Heike Koeckler)

V Ageing in the city - staying mobile despite the heat? Meeting GERT

(Yasaman Ahmadi, Kerstin Conrad, Susanne Penger, Maren Reyer, Anja Stotz)

VI Scenarios and living labs for sustainable future urban development

(Oscar Reutter)

3:00 pm Coffee break

3:30 pm Workshops, part II

4:30 pm „Core messages of the workshops“: Lessons learned

Moderation Claudia Hornberg (University Bielefeld) and Andrea Ruediger (TU Dortmund University)

5:00 pm View and reflection to the Junior Research Groups

Stefan Zerbe (Free University of Bozen-Bolzano)

5:10 pm Closing ceremony

Marilen Macher and Sabine Baumgart
